

L.O: To identify the features of a non-chronological report.

Non-chronological reports

Does anyone know what a non-chronological report is?

Purpose:

- Non-chronological reports don't have to be read in any order.
- Aim to give us information on a topic.
- Written to give other people information.
- Useful for studying things we don't know a lot about.
- Written in paragraphs.
- Contain an introduction, main body and final paragraph.
- Reports contain specific features.

Werewolves

Introduction

How dangerous are they?

Often perceived as a threat throughout history, werewolves generally prey on any living thing; however they particularly target children. Werewolves attack in a variety of ways. The Scandinavian werewolf is known to use its sharp, poison-coated claws. This creature uses its gaze to paralyze its victims which enables the final blow to be delivered with outstanding accuracy. Some werewolves are known to target the graves of their victims; digging up bodies to consume to satisfy their cravings.

Modern culture

Even after many centuries of tales, a fascination with werewolves still exists in modern society. The most popular depiction of a werewolf on film is in the renowned movie franchise: 'Twilight'. Another work of fiction which mentions these mythical beasts is 'Harry Potter'. This series of books features several werewolves (including Remus Lupin).

Appendix 1

Traditionally, a werewolf is indistinguishable from an ordinary wolf apart from several features. These are: a larger body, lack of a distinct tail, human eyes and voice. When a werewolf is in human form, they have tell-tale physical traits including: meeting of both eyebrows ('monobrow'), curved fingernails, low-set ears and a swinging stride.

Shape-shifting ability

Werewolves are humans who transition into wolf-like creatures, either purposefully or after being placed under a curse. Various methods of becoming a werewolf have been reported. In folklore, most werewolves originate from being cursed, often with a bite. Historically, most werewolves transform under the light of a full moon. Some historical tales suggest stranger methods of transformation, such as rubbing the body with magic ointment, drinking rainwater out of the footprint of the animal or repeating a set spell. After returning to their human form, werewolves are usually documented as becoming weak, debilitated and undergoing painful, nervous depression.

Features of a non-chronological report:

Introduction -
What is the report about?

Sub-headings -
Separate your information.

Main information -
Facts about your topic.

Present Tense -
Imagine it is happening now.

Third Person -
Use he, she, it, etc.

Pictures/Diagrams -
What does it look like?
