

During this week I would like you to think about the following statement and make a poster or do a piece of creative writing which could be displayed in the corridor or in the music room with either the words themselves or a picture to represent them. All the years will have a similar task. You could write song lyrics as well and music!

Your quotes are combined from middle school music teachers brainstorm!

Music is for everyone regardless of culture, background, age, religion or gender.

Music is creative, academic, practical, analytical, brain building, emotional, evocative, challenging, powerful, spiritual and fun!

Use your imagination and try to show us how you would express these ideas.

Send me your ideas on the learning platform.
