

Year 5 Music-wb 6th July 2020

I know that many of you have spent lots of time outside in the mostly marvelous weather and I`m sure that as you`ve been outside you will have noticed amazing wildlife (Many of them insects!)

As preparation for some work in September which we would have done in school this term I would like you to watch a you tube clip of a spider spinning a web and plan a piece of music to accompany part of the video.

My suggestion to watch is <https://www.youtube.com/watch?v=zNtSAQHNONo>

This is an amazing piece of film which explains the process as it happens.

The music does change several times (I don`t like the first choice but be patient!!)

There are many other clips you could choose. You could watch with no music at first and see what difference music makes to your enjoyment of the video.

Choose any section for your composition.
