

Monday 22nd April is Earth Day

Earth Day is an annual, international event held every year on 22nd April. Its aim is to raise awareness for our planet and the environmental challenges it faces.

**Helping the planet is
in our hands!**

What will you do?

It is an opportunity for people to show their support for the environment and come together to take action to help protect the Earth.

On Monday Lunch time, members of the Eco-Committee will be in the dining room with 'Earth in our hands' posters.

Pick the pledge you want to make and sign that hand.

I will save water when I
brush my teeth.
